We got some exciting updates for 2025, further solidifying, our position as a key player in the core mountain biking industry. We've doubled down on our commitment to rider-driven innovation, and focused on products catered by and for all riders out there.

BODY ARMOR

The ARCON Chest Protector HD Pro, built to ride by Nico Vink.

Designed, built and tested together with Nico Vink, one of the first true Pro Models in the ION product range. Nico needs little introduction but is widely respected via his riding and vision, together with his experience in all aspects and years of the sport. After two years of development, this Pro Model embodies riders', female and male, needs and pushes the boundaries of protection and design.

SCRUB

Scrub Select with GRDXKN® Technology: the TFR girls have been crushing all the UCI DH Tracks with our Scrub line, with Valentina Roa Sanchez taking home the 2023 Overall Champion title. Alongside the team's feedback, this kit now also features a revolutionary fabric imprint treatment for enhanced strength and durability, crucial for conquering the toughest downhill tracks.

TRAZE & SHELTER

Traze AMP AFT: We want everyone to experience ultimate comfort and breathability on extended rides with the new 50% Merino Wool blend fabric on the Traze AMP AFT jerseys.

Shelter Line: Discover the upgraded performance of Ripstop fabrics, and the best-selling softshell jacket's improved Waffle fleece technology.

These highlights show just one corner into the extensive 2025 ION collection. Check out the full collection and enjoy surfing trails!

UPDATES

2025 DESIGN THEME

EXPLORE BEYOND

—

Adventure makes us live. It is the source of our energy, the engine of our existence. Whether in far away lands or close to home, the exploration begins as soon as curiosity awakens. It develops an exaltation of the senses which reveals an intense happiness to discover new things, to exceed the limits and to shake up the status quo.

The „Explore beyond“ collection was designed to give confidence to people to push the limits and go to meet the unknown. To discover oneself, to feel alive, to blossom and thus contribute as a person to the wealth of humanity.

BUILT TO RIDE
BY NICO VINK

RE ZRO®

ARCON CHEST PROTECTOR HD PRO

We are incredibly stoked about launching the first Pro Model of ION.

Together with Nico Vink, it has been an exciting journey of design workshops, development ideations and extensive testing. We focused on solving the needs of riders which were still unsolved by the current items on the market. Breathability, flexibility and freedom of movement are some, but equally important were reinforcing key protection areas with innovative and sustainable materials without loss of quality.

We are stoked to extend the innovative ARCON line with a new body armor item, developed and built to ride, based on +20 years of experience from racing to big mountain freeride.

The ARCON Chest Protector HD Pro is built with Re Zro key components which are a combination of energy-absorbing Level 2 protectors and Re Zro Power Slide Caps.

Both the chest and back sections are 3D pre-shaped, offering a new personalized fit and are extremely comfortable to use under or above the jersey.

LEVEL 2 - PROTECTION

You find full Level 2 protection on the back, as well as on the chest. Additionally, Re Zro Power Slide Caps are strategically placed on front and back for extra impact and sliding properties.

RIDE WITH BREEZE

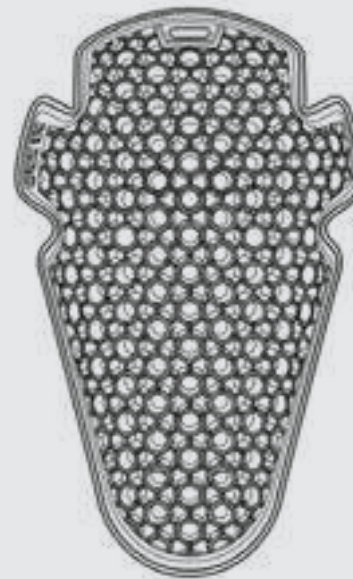

The unique Re Zro shape, and large ventilation openings in the Re Zro Powder Slide Caps, give it the 360° AC_cooling; an almost imperceptible feel while riding.

PRO DESIGN

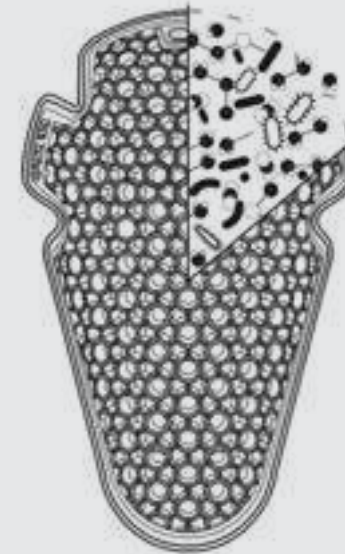

The SyncBody elastic straps sync the ARCON Chest Protector HD Pro with any rider. They can be easily customized in length and position, while the one buckle closure makes it easy for any kind of rider to put the protector on and off quickly.

IN USE

14.4% IN 3 MONTHS

3-5 YEARS

RE ZRO®

THE FIRST BIODEGRADABLE L-2 PROTECTION

Re Zro is our new partner for the expanding ARCON line, that pushes the transformation of the body armor category with biodegradable level 2 protection ingredients.

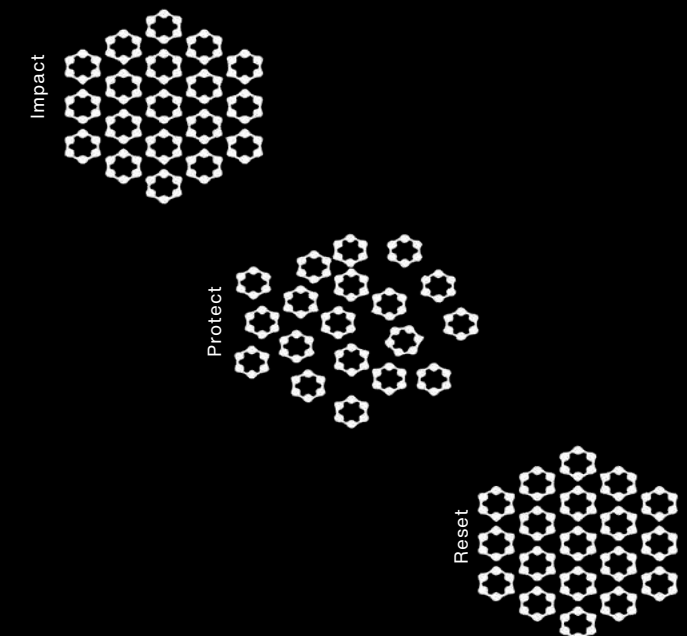

<https://youtu.be/ZS1SYAHfkBE>

1. The biodegradation process will only start when the products find themselves in a landfill environment.
Landfill environment = Microbe rich and Oxygen depleted.
2. Microbes and fungi colonize at a molecular level.
3. They feast on the carbon of the plastic.
4. Leaving only biogas and biomass behind.

*For more info on Re Zro's biodegradability, please visit:
www.re-zro.com/terms

LEVEL 2 PROTECTION

Re Zro's proprietary technology protects the riders through the fracture of the molecular bonds under impact, releasing energy through heat and sound, a material behaviour known as shear-thinning. The Supermolecules then recombine immediately after impact, RE setting to ZRO.

GRDXKN STRUCTURE PRINTING

GRDXKN®

GRDXKN is a novel interplay between graphics and fabrics. By printing the technology onto the fabric, the weight stays low and the flexibility high. The function and design are integrated are elevated to a common level.

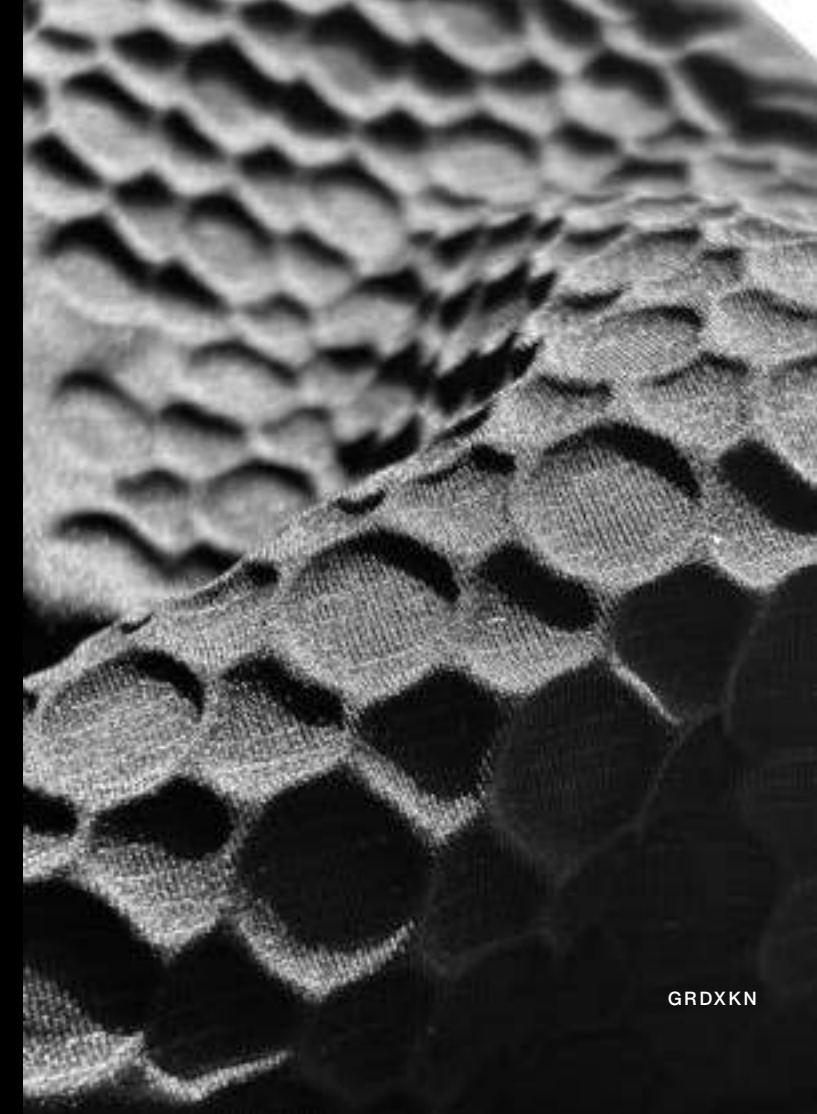

STABILIZING

The structure printing technology stabilizes the textiles with special support architecture, thus stiffens these to be even more tear-resistant. Making the fabric ready for any track or challenge

LOW WEIGHT

Due to the foamed material composition, GRDXKN is a high level of balance between stability and low weight.

GRDXKN

AERODYNAMIC

The structure print creates a concave structure – ‘golf ball structure’ – that has aerodynamic effects on the surface. Perfect fitting for where each second counts.

ABRASION-RESISTANT

GRDXKN intentionally combines different materials making the surface abrasion-resistant.

VENTILATING

The structure is very variable in shape and dept, with cavities created that offer breathability effect on the clothing, needed when pushing the limits on the bike.

JERSEY GRIDXKN® SCRUB SELECT UNISEX

The ION Bike Jersey GRDXKN Scrub Select is purpose-built with, and for, downhill -oriented riders. Utilizing the 2024 Power Knit technology, this jersey boasts exceptional durability without snagging or peeling. Additionally, to the AMP BAT, GRDXKN® print is strategically placed on the shoulder and elbow areas, offering the industry-highest level abrasion resistance. Due to the light shock absorption function of GRDXKN®, there is now also additional layer of light impact protection.

Laser-cut venting holes ensure optimal airflow to prevent overheating. The fabric mix dries quickly and facilitates active moisture exchange, keeping you comfortable during intense rides. For fitting comfort you can count on a seamless construction at the hem and collar to minimize irritation. Whether you're hitting UCI DH tracks, big jump lines or fast bike park runs, the ION Bike Jersey GRDXKN Scrub Select has got your back!

PANTS GRIDXKN® SCRUB SELECT UNISEX

The ION Bike Pants GRDXKN Scrub Select combine race style with functionality, built for and by downhill-oriented riders. Crafted from the most durable fabric in our range; the (DPE) Durable Polyamid Elastic. DPE is made out of 30% Nylon 6.6, 60% Nylon and 10% Spandex which makes it nearly unbreakable, with a weight of only 176g/ m2.The GRDXKN® print is strategically placed on the hip, knee, and shin areas to enhance both abrasion resistance and very-light shock absorption.

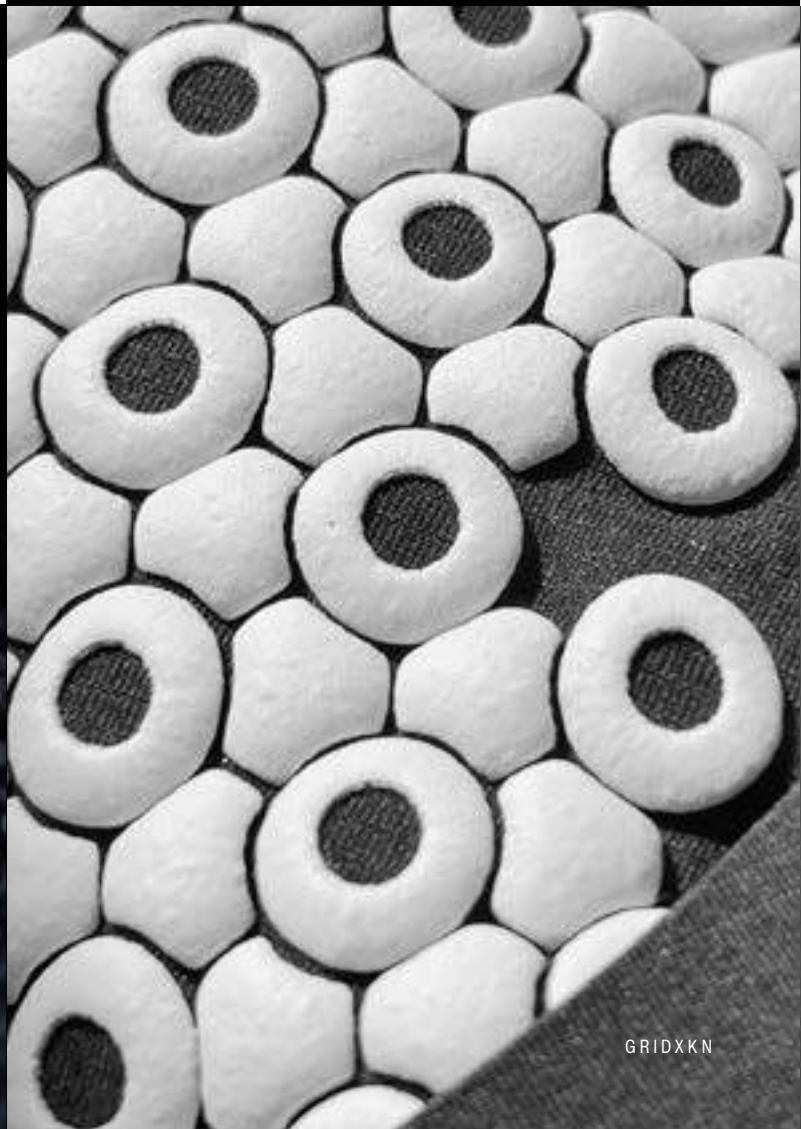

A ratchet front closure ensures a perfect fit, while the laser-cut holes throughout the pants offer additional ventilation. With a tapered race fit and ergonomic leg shape, the ION Bike Pants GRDXKN Scrub Select are your go-to choice for conquering trails with confidence.

SAVE OUR PLAYGROUNDS

You rely on our gear every day. That is why it was designed to withstand years of use and is ready for more. Ion products are made from durable and innovative materials, opted by approved suppliers to SAVE our playgrounds.

At last it's about extending our product's lifecycle and we believe less consumption is more for the planet. Nevertheless, building sports gear will always have an environmental footprint. Therefore, we see it as our mission to counteract the development of environmental pollution by doing our best to keep the sea and air clean and our earth healthy.

"Save our playgrounds" is an initiative to coordinate and bundle all actions of our brand to protect our environment. It is paired with steady efforts to minimize our company's footprint whenever possible." We take these efforts very serious because we are responsible for ensuring that also future generations can live the stoke of surfing elements.

For more details check
www.ion-products.com/bike/save-our-playgrounds/

PRODUCTION

We are committed to bringing production and marketplace closer together while optimizing our global supply chain structure with new production sites in Europe.

MATERIALS

ION is continuously sourcing for new, innovative and more sustainable materials. We are committed to avoid the use of harmful chemicals by opting for approved materials and suppliers. The majority of our fabric manufacturers are bluesign® and Ökotex 100 certified.

PACKAGING

We invest in sustainable packaging that over time reduces its environmental footprint.

MINDSET

We see it as our mission to minimize the environmental footprint with several efforts in all business areas.

partnerships

ION relies on the behavior and resources of several key partners who work to improve the way we build our products and conduct our business.

In order to make it easier for our partners and consumer to find our eco efforts in the ION product range, we introduced the product seal "save our playgrounds – fair & clean content".

We commit to the six focus points shown above, and apply this label when achieved all six of them.

SUSTAINABILITY

C0 DWR

RAIN WON'T STOP ANY PERFORMANCE.

While most outerwear clothing are applied with a waterproof/breathable membrane to stop water from penetrating to a rain jacket's interior, a DWR (durable water repellent) coating is also needed to prevent precipitation from saturating the jacket's exterior.

DWR C0 is the durable water repellent technology applied to all Shelter fabrics which is totally fluorine free and fully sustainable.

SCRUB

2025 ION

SCRUB

SCRUB: UCI DH TESTED & APPROVED

Together with the Transition Factory Racing Team, our Scrub line has been put through the ultimate testing. We refined our most durable line on the gnarly tracks of 2023 UCI Downhill Racing to strengthen the Scrub AMP BAT standards, and introduce GRIDSKIN as the ultimate durable ingredient to the new Select line.

BODY AMPLIFIED TECHNOLOGY

The innovative Scrub panel design that combines a perfect mix of lightweight with highly durable materials. The use of robust fabrics ensures a long lifetime of your gear even with many ground contacts.

BONDED HEM

Bonded hems to avoid friction and minimize irritation during riding.

GRAPHENE 4 WAY STRETCH (G-4 STRETCH)

G-4 Stretch uses the graphene fabric capacity to regulate the rider's body temperature in cold or warm temperatures, while also providing the highest possible tensile strength. By placing the graphene yarn inside the fabric, it reinforces the 4-way stretch to the highest level of durability.

GRIDSKIN

An industry first printing technology to strengthen fabrics, directly onto the fabric. Via this technique the weight stays low and the flexibility high. The function and design are integrated are elevated to a common level.

DURABLE POLYAMID ELASTIC (DPE)

DPE is the newest most durable fabric in our range, made out of 30% Nylon 6.6, 60% Nylon and 10% Spandex which makes it nearly unbreakable, applied on the whole Scrub range. Also extremely lightweight with only 176g/m2.

LASER CUT VENTING HOLES

Strategically placed laser cut holes to make sure there is enough ventilation for the rider, front and back

POWER KNIT

A recycled polyester/polyester mix, can be found across the whole jersey, and it uses a special tight knitting technique, like woven fabric, so fibers are not easily snagged.

RATCHET FRONT CLOSURE

Functional closure system that gives the rider the perfect personal fit, easy to use with or without gloves

TRAZE

WOOL JACQUARD MIX

For our Traze collection, performance and lightness are key topics. Therefore, only the AMP AFT jersey and pants will be available from 2025, with only the best for these topics.

For the Traze Jersey AMP AFT SS and LS, we introduce the Wool Jacquard Mix. It is a mix off 50% RWS certified, muelsing free Merino wool, in combination with 50% Polyester. The fabric is knitted together as a mesh so it ventilates through the openings. From the outside this gives an optical detailed effect, as done in Jacquard weaving. With 145gr of weight and the snagging resistant surface, it will perform fantastically trough any condition.

The wool blend will help to regulate your temperature by transporting any moisture to the outside, while fast-drying and feel extremely comfortably.

It is total gamechanger for any trail or enduro rider to enjoy.

HYBRID PANEL ON SHOULDERS

AIR FLOW TECHNOLOGY

HYBRID PANEL ON SHOULDERS

Abrasion resistance fabric mix, strategically placed on the back & shoulders to support backpack and hipbelt straps.

AIR_FLOW TECHNOLOGY

A smart and innovative design that combines the very lightweight & highly breathable materials for perfect ventilation while riding

LASER VENTING HOLES TRAZE AMP AFT SHORTS

OUTERWEAR

OUTERWEAR LAYER TECHNOLOGY

OUTERWEAR – MORE LAYERS, MORE VARIATIONS LESS ENVIRONMENTAL IMPACT.

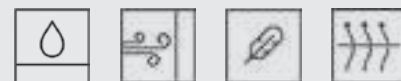

Adding new styles, cutlines, and materials to our Shelter range enables riders to face any conditions. From mellow day trips in late summer to muddy home trails and skidding through snowy backcountry lines.

The number in the product names (3L) refers to how many layers are bonded together to create a waterproof fabric.

Each model features a membrane that works as a waterproof barrier.
On top, they feature a water-durable repellency treatment.

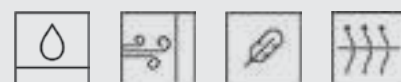

3 LAYERS

The delicate membrane is laminated onto a robust inner layer that sandwiches the membrane between itself and the outer shell. Though this sounds like a lot of material, the laminated construction feels like one single piece of fabric when worn.
Very durable, High level of weather protection,
Soft next-to-skin feeling.

2.5 LAYERS

Instead of an inner layer, this technology uses a spray-on coating on the inside to protect the membrane against wear and tear.
Flexible material, Lightweight.

2 LAYERS

The membrane is directly bonded to the outer shell. On the inside, a sewn-in mesh fabric increases wearing comfort and protects the membrane from abrasion. Durable material,
Comfortable, Weather protection.

3L TECHNOLOGIES

10K/10K

10,000 Water column / 10,000 Breathability making our 3L jackets and pants fully WaterBomb_proof.

CO DWR

A durable water repellent (DWR) teflon-based and non-fluorinated coating. The finish is applied without impacting feel or breathability.

FLYING TEX 3L

The Flying Tex 3L fabric is PFC- Free severe weather protection. A resistant and light Outerlayer is laminated with a sustainable high performance membrane and comfortable Inner backing.

FULLY TAPED SEAMS

All seams are reinforced in the 3L pants and Jackets to give no option for extreme weather to penetrate and keep the rider dry in all weather conditions.

RIPSTOP

A reinforcing fabric with a favourable strength-to-weight ratio that reinforce the fabric and ensure that even if a small tear happens, this can not easily spread.

WATERPROOF ZIPPERS

All zippers, including all strategic placed ventilation zippers on the pants and jacket, are fully waterproof to make sure the 3L range is fully WaterBomb_proof.

HELMET_READY HOOD

A bike helmet specific hood to give the rider full protection during extreme conditions.

2L SOFTSHELL TECHNOLOGIES

RIPSTOP

A reinforcing fabric with a favourable strength-to-weight ratio that reinforce the fabric and ensure that even if a small tear happens, this can not easily spread.

SOFTSHELL 2L_GUARD

The inner membrane, Waffle fleece, is directly bonded to the stretchy woven nylon outer shell. The outer shell ensures durability, while the fleece backing on the inside gets you that additional comfort in colder temperatures.

UNDER HELMET HOOD

Protects the rider from any weather while keeping it comfortable in colder temperatures.

WAFFLE FLEECE

Waffle fleece has open spaces in between due to the structure where it will capture warmth, and at the same time transport heat efficiency. Together with the windproof nylon from the 2L_Guard, it keeps the rider dry and ventilated.

CO DWR

A durable water repellent (DWR) Teflon-based and non-fluorinated coating. The finish is applied without impacting feel or breathability.

INSULATION TECHNOLOGIES

4-WAY STRETCH SIDE INSERTS

The Thermolite Hybrid vest comes with a 4-way stretch material on side inserts, to give ultimate freedom of movement in any riding position.

LYCRA THERMOLITE

Thermolite Ecomade T-Down is a loose, feather-like construction that leaves enough space between clusters to trap heat using air and open space. An advantage in comparison to normal down is the fast-drying characteristics (32% faster), perfect for Shelter riding conditions.

PRIMALOFT

Primaloft is an industry leading insulation material, made out of 100% recycled bottle chips reprocessed and spun into fibers finer. Result is softer than cashmere, which delivers uncompromised loft and warmth.

SONIC CHAMBER CONSTRUCTION

Wind-resistant Polyamid in an ultrasonic chamber bonding construction. It avoids stitching between the layers and keeps the fabric 100% windproof for maximum warmth.

CO DWR

A durable water repellent (DWR) Teflon-based and non-fluorinated coating. The finish is applied without impacting feel or breathability.

ARCON is the new protection line that brings the same development, passion and transformation as the KPACT. but with refreshed partners, progressive designs and innovative protection elements.

We have built an expansive ARCON line, all equipped with the industry-first fully biodegradable level 2 Re Zro protection . Together with their market leading ventilation and lightweight characteristics, the ARCON line is pioneering the protection in MTB.

RE ZRO®

- 

STAY COOLER FOR LONGER WITH OUR MARKET LEADING VENTILATION.
- 

LIGHTWEIGHT AND LOW PROFILE GIVING YOU THE ABILITY TO PUSH TO THE LIMITS UNINHIBITED.
- 

ULTIMATE FREEDOM OF MOVEMENT WITHOUT SACRIFICING PROTECTION.

We've partnered with TOTO-TOA® to make a smarter and safer impact on the environment. When recycling is not available, the RE ZRO® material is designed to quickly biodegrade* when responsibly disposed of and left in landfills and the natural environment, where most plastics end up.

Special ingredients are added during the manufacturing process of the RE ZRO® materials to speed up the biodegradation process in an oxygen-depleted environment. At the end of lifewhen a RE ZRO® product is disposed of in a landfill, the special ingredients are activated, and the biodegradation process begins. This takes three to five years, whereas traditional synthetic products take hundreds of years.

CHARACTERISTICS OF OUR SAS-TEC FOAM

VISCOELASTIC PU FOAM WITH MEMORY EFFECT

After an impact or any kind of deformation the foam (protector) returns to its original shape within shortly.

MULTI IMPACT COMPLIANT

Unlike many other dampening materials (such as styrofoam (EPS), silicone, injected plastics or foam of inferior quality) the SAS-TEC foam is multi impact compliant. Thus impacts do not destroy the protector even when the same area is affected repeatedly. The protector keeps its full functional capability.

LIGHTWEIGHT

High absorbability despite low density.

ADAPTIVE ENERGY ABSORPTION

The higher/faster the impact, the higher the resistance of the foam. Reason for this unique properties is the micro structure of the exclusive SAS-TEC PU foam.

SPONTANEOUS RESPONSE

Contrary to hard shell protectors, styrofoam damper or many other dampening materials, SAS-TEC foam reacts promptly and without any time delay even to minor impacts. The energy absorption goes almost linear, which keeps the impact forces to the human body at a low level.

ENVIRONMENTAL COMPATIBILITY

In contrast to the PU foams of the competitors, the SAS-TEC foam is not based on mineral oil but on renewable raw materials (vegetable oils).

THE BOA® FIT SYSTEM.

Delivering fit solutions purpose-built for performance, the BOA® Fit System is featured in products across industries (including sports, workwear and medical) and consists of three integral parts: a micro adjustable dial, a super-strong lightweight lace and low friction lace guides. Each unique configuration is engineered for fast, effortless, precision fit and is backed by the BOA® Guarantee.

1. DIAL

Adjusts fit with precision and allows for a fast release.

2. LACE

Lightweight, strong and expertly configured for performance.

3. LACE GUIDES

Low-friction guides to ensure a smooth and precise fit, every time.

HOW IT WORKS.

- PUSH IN TO ENGAGE
- TURN TO TIGHTEN
- PULL UP FOR QUICK RELEASE

DIAL IN TO FAST, EFFORTLESS, PRECISION FIT.

AGILITY AND SPEED

The BOA® Fit System enables faster, more powerful directional changes through a seamless connection between equipment and body.

POWER AND PRECISION

Power without compromising precision, the BOA® Fit System delivers more explosive action and unparalleled accuracy.

ENDURANCE AND HEALTH

Go further, faster, and stronger. The BOA® Fit System saves energy by improving circulation and efficiency.

DURABILITY AND QUALITY

Engineered with high quality, durable materials, and rigorously field tested, the BOA® Fit System is guaranteed to perform in any environment.

THE BOA® GUARANTEE

FIT FOR LIFE WITH BOA®.
The BOA® Fit System dials and laces are guaranteed for the lifetime of the product on which they are integrated.

BREAK A DIAL OR LACE?
Visit BOAFIT.COM/SUPPORT to get your free repair kit. Repairs can be performed fast and easy.
